

CARYOPTERIS PLANT NAMED 'INOVERIS'

Abstract of the Disclosure

A new and distinct cultivar of *Caryopteris x clandonensis* plant is provided that is a seedling formed following the induced mutation of the 'Heavenly Blue' cultivar (United States Plant Patent No. 1,091). Gamma radiation was utilized to create the mutation. The new cultivar can be readily distinguished from its parent by a more upright and more uniform growth habit, darker green foliage, more intense violet-blue flowers, and shorter internodes.
